Contemporaneità e dinamismo
identificano un nuovo concetto di
arredamento. La zona giorno
si carica di nuovi significati e di
un ritrovato carattere. L'estetica
diventa funzionale, geometrie
architettoniche si esaltano
attraverso materiali grezzi, ruvidi,
veri. Al di fuori dagli schemi, lontano
dagli standard. Rebel System,
la nuova collezione firmata FIMAR.

*Contemporary styles and movement
identify a new concept in furnishing.
The living area takes on new
meanings and a refound personality.
The aesthetic becomes functional,
architectural forms are enhanced
through raw, rough, genuine
materials. Out of the mould, far from
the standard. This is Rebel System,
the new collection by FIMAR.*

Rebel System manifesta un' assoluta capacità di raccontare una modernità fatta di volumi in equilibrio, accostamenti di colore e materia ed effetti tridimensionali dati dalla Boiserie in legno dove le doghe sono posizionate a distanze diverse dal muro. Un progetto originale e brevettato, che diventa unico grazie alla particolarità delle finiture che lo caratterizzano.

Contemporary styles and movement identify a new concept in furnishing. The living area takes on new meanings and a refound personality. The aesthetic becomes functional, architectural forms are enhanced through raw, rough, genuine materials. Out of the mould, far from the standard. This is Rebel System, the new collection by FIMAR.

Partendo da materiali esistenti, ridando loro vita e valore, rispettando l'ambiente: così nasce Rebel System. Riciclare diventa la parola d'ordine. Il legno, derivante da vecchie cascine, il vetro ed il ferro che ricordano realtà industriali dismesse, materiali totalmente naturali come il compact a base di fibra di eucalipto. Materiali veri, abilmente trattati, che identificano il nuovo concetto della zona living dove natura ed ispirazione si declinano allo spazio abitativo.

Starting with existing materials, bringing them back to life and adding value, with eco friendliness: this is how Rebel System takes shape. The byword is recycle. The wood taken from old farmhouses, the glass and iron reminiscent of disused industrial buildings, totally natural materials such as the compact type made from eucalyptus fibres. Real materials, skilfully treated, which identify the new concept of the living area where nature and inspiration are structured according to the living space.

essentiality of the forms.
A unique contrast
and fascinating.*

La nuova collezione di sideboards Rebel System, nasce dall'idea di interpretare eleganti contenitori per l'area living in forme inedite e originali. Un segno grafico deciso, superfici laccate opaco si alternano ad essenze di legno attribuendone un'identità ben precisa. La collezione di sideboards è perfettamente in sintonia estetica con tutti i prodotti Fimar, per creare un ecosistema ideale per la casa contemporanea.

The new collection of sideboards Rebel System, comes from the idea of interpreting elegant containers for the living area in new and original forms. A decisive graphic sign, matt lacquered surfaces alternate with wood essences, giving them a precise identity. The collection of sideboards is in perfect aesthetic harmony with all Fimar products, to create an ideal ecosystem for the contemporary home.
